

Team: _____

MULTI-STEP EQUATIONS TEAM RELAY

Solve the equation below step-by-step, showing all work:

1) Clear any parentheses using the Distributive Property

2) Combine like terms within each side of the equal sign

3) Add/subtract terms to get the terms with variables on one side of the equal sign and the constant terms on the other side

4) Multiply/divide to isolate the variable

5) Check your answer by plugging it in for the variable in the original equation
